### REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance:

The present invention is directed to a magnetic tape tracking control apparatus for controlling tracking of tracks on a magnetic tape by a rotary head. Independent claim 1 identifies the uniquely distinct features "error lock detecting means for determining whether the phase of said counting means is clocked to a target track first setting means for setting said counting means by a count value corresponding to the track number information of said detected search video data; and comparing means for comparing said reference phase with said tracking phase to control tracking on the basis of a result of the comparison." The closest prior art, Lane (US Pat. No. 5,740,307) discloses a tracking control method, either singularly or in combination, fail to anticipate or render the above underlined limitations obvious.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
